THE

AMERICAN JOURNAL

OF

SCIENCE AND ARTS.

CONDUCTED BY

PROFESSORS B. SILLIMAN, B. SILLIMAN, JR.,

AND

JAMES D. DANA,

IN CONNECTION WITH

PROF. ASA GRAY, OF CAMBRIDGE,
PROF. LOUIS AGASSIZ, OF CAMBRIDGE,
DR. WOLCOTT GIBBS, OF NEW YORK.

SECOND SERIES.

VOL. XXXIV.—NOVEMBER, 1862.

WITH SIX PLATES.

NEW HAVEN: EDITORS.
1862.

PRINTED BY E. HAYES, 426 CHAPEL ST.

Q
1
A52
vol 34

CONTENTS OF VOLUME XXXIV.

NUMBER C.

Page.

Art. I. Description of the Remains of a new Enaliosaurian (Eosaurus Acadianus), from the Coal Formation of Nova Scotia; by O. C. Marsh, B.A.—With Plates, - - - - - 1

II. The Physiology of Sea-sickness; by Richard Meade Bache, 17

III. On the Empirical Interpolation of Observations in Physics and Chemistry; by W. P. G. Bartlett, - - - - - 27

IV. On Electrical currents circulating near the Earth's surface, and their connection with the phenomena of the Aurora Polaris.—9th Article; by Prof. Elias Loomis, - - 34

V. Observations on the Saltwaters of the Alleghany and Keskeminetas Valleys; by Dr. Edward Stieren, - - - 46

VI. A Sketch of the Mandan Indians, with some Observations illustrating the Grammatical Structure of their Language; by Dr. F. V. Hayden, - - - - - - - - 57

VII. On Triethylamine; by M. Carey Lea, - - - - - 66

VIII. Notes on American Fossil Fishes; by Dr. J. S. Newberry, 73

IX. Experiments on the formation of Infusoria in boiled solutions of organic matter, enclosed in hermetically sealed vessels, and supplied with pure air; by Prof. Jeffries Wyman, M.D., 79

XI. Geographical Notices. No. XVII, - - - - - - 87

Kilimanjaro, the snow covered Equatorial Peak of Africa, 87.—Livingstone's Expedition.—The Rovuma River, 89.—Yoruba and the Niger Valley, 93.—Dr. Hayes's Arctic Voyage, 95.—Meteorological record at Kanagawa, Japan, 1860: Schlagintweit's India and High Asia, 96.—United States Government Surveys, 98.

XII. H. and R. de Schlagintweit on the Geographical Configurations of India and High Asia, - - - - - 101

XIII. On the Detection of Picrotoxine; by John W. Langley, S.B., 109

XIV. Some contributions to a knowledge of the constitution of the Copper Range of Lake Superior; by C. P. Williams, A.M. and J. F. Blandy, M. and C.E., - - - - - 112

XV. Correspondence of JEROME NICKLÈS, dated Nancy, France, May 6, 1862—Obituary—J. B. Biot, 120.—Isidore Geoffroy St. Hilaire, 122.—Acclimation—Disease of Silkworms, 123.—Astronomy, French Bureau of Longitude—New Observatories—International College, 125.—Manufacture of Aluminium, 126.—Culture of Cotton—Scientific News, 127.—Bibliography, 128.

SCIENTIFIC INTELLIGENCE.

Physics.—On the Spectrum afforded by solution of Nitrate of Didymium, (from a letter of Professor O. N. ROOD to Dr. WOLCOTT GIBBS, 129.—Effect of powdered Ice in water boiling in Glass Vessels; by Prof. P. A. CHADBOURNE: Galvanic Experiment, 130.

Chemistry.—On the Oxyd of Ethylene, WURTZ, 130.—On new modes of forming certain hydrocarbons, WURTZ: On Hyperchloric Acid, ROSCOE, 131.—On hyponitric acid: MÜLLER, 132.—On the sulphids of the alcohol radicals, CARIUS and FERREIN: On certain Ammonia-ruthenium Bases, CLAUS: On a method of preparing Chlorinated Organic Bodies, HUGO MÜLLER, 133.

Applied Chemistry.—The Tannin Process; by Prof. EDWARD EMERSON, 134.

Geology.—Geology of Vermont: Mastodon Tooth in Amador Co., California, 135.—New species of Silurian fossils; by E. BILLINGS, F.G.S.: True position of the so-called Waukesha Limestone of Wisconsin; by Dr. C. ROMINGA: Note on the Description of Lingula polita, 136.—Descriptions of new Lower Silurian (Primordial), Jurassic, Cretaceous, and Tertiary Fossils, collected in Nebraska, by the Exploring Expedition under the command of Capt. Wm. F. Raynolds, U.S. Top. Engrs.; by F. B. MEEK and F. V. HAYDEN, 137.

Botany and Zoology.—On the Various Contrivances by which British and Foreign Orchids are Fertilized by Insects, and the Good Effects of Intercrossing; by CHARLES DARWIN, M.A., F.R.S., &c., 138.—Outlines of the Distribution of Arctic Plants; by Jos. D. HOOKER, M.D., F.R.S., 144.—On the Cedars of Lebanon, Taurus, Algeria and India; by J. D. HOOKER, M.D., F.R.S., 148.—Weddell's Chloris Andina, 150.—Histoire Naturelle des Zoophytes Echinodermes....par M. F. DUJARDIN et par M. H. HUSSÉ, 151.

Meteorology.—Meteorology, WILLIAM HAIDINGER, 152.

Miscellaneous Scientific Intelligence.—The California Geological and Natural History Survey: Lyman's Trigonometer, 157.—Donation of types of American Reptiles by the Smithsonian Institution to the Museo Civico of Milan, 159.—*Obituary.*—Edward C. Herrick, 159.

NUMBER CI.

Page.

ART. XVI. On the Ancient Lake Habitations of Switzerland; by JOHN LUBBOCK, Esq., F.R.S., - - - - - - - 161

XVII. Upon the structure of the Brain in Man and Monkeys, and its bearing upon classification, with special reference to the views of Owen, Huxley and Gratiolet; by R. WAGNER, - 188

Page.

XVIII. On some Stereoscopic Experiments; by Professor O. N. Rood, of Troy, N. Y., - - - - - - - - 199

XIX. Tenth Supplement to Dana's Mineralogy; by George J. Brush, Professor of Metallurgy in Yale College, - - 202

XX. On Phosphatic Guano Islands of the Pacific Ocean; by J. D. Hague, - - - - - - - - - - - - 224

XXI. Contributions from the Sheffield Laboratory of Yale College.—III. On Amblygonite from Hebron in Maine; by George J. Brush, - - - - - - - - - - 243

XXII. On a constant Aspirator and Blower; by M. Carey Lea, Philadelphia, - - - - - - - - - - 245

XXIII. Enumeration of the Plants of Dr. Parry's Collection in the Rocky Mountains, (continued from vol. xxxiii, p. 411); by A. Gray: with Supplements by G. Engelmann and A. Gray, - - - - - - - - - - - - 249

XXIV. Abstract of a discussion of the Horizontal Component of the Magnetic Force, from observations made at the Girard College Observatory, Philadelphia, in the years 1840–'41–'42–'43–'44–'45; by A. D. Bache, LL.D., F.R.S, etc, - 261

SCIENTIFIC INTELLIGENCE.

Physics.—The Saltness of the Sea, Forchhammer: Saltness of the Ocean, 272.—Saltness of Oceanic Currents, 273.—Counter-currents: Composition of the salts, 274.—Density of Ice, Dafour, 275.

Chemistry.—Thallium, a new metal, Crookes, 275.

Technical Chemistry.—On Siemens' Regenerative Gas Furnace, Faraday, 277.—Note on, 280.

Geology.—Dyas, oder die Zechstein Formation und das Rothliegende, by Dr. Hanns Bruno Geinitz, 280.—Preliminary notice of some of the species of Crinoidea known in the Upper Helderberg and Hamilton Groups of New York; by James Hall: Dana's Geology: The Student's Manual of Geology; by J. Beete Jukes, 282.

Botany and Zoology.—Antherology: Note on the Structure of the Anther, by Prof. Oliver of King's College, London, 282.—Wood-cells of Hamamelideæ imitate Coniferous markings, 284.—Journal of the Proceedings of the Linnæan Society, Botany: On two forms of Dimorphic Condition in the species of Primula; by Charles Darwin: West African Tropical Orchids; by Dr. Lindley: On Inocarpus; by Mr. Bentham, 285.—Address of Geo. Bentham, Esq., read at the anniversary meeting of the Linnean Society: Botany of Northeastern Asia, 286.—Cork: De la Production Naturelle et Artificelle du Liége dans le Chêne-Liége, par M. Casimir de Candolle, 287.—Martius, Flora Brasiliensis: Grisebach's Flora of the British West Indian Islands: On the genus Euphorbia in DeCandolle's Prodromus; by G. Engelmann, 288.—Carex, 292.

Zoology.—Geoffroy St. Hilaire's System of Zoology, 292.

Astronomy and Meteorology.—Account of the great comet of 1858, being vol. 3d of the Annals of the Astronomical Observatory of Harvard College; by G. P. Bond, 292.—Comet II, 1862: Companion to Sirius; by Lewis Rutherfurd, 294.—The Meteors of August 10th, 1862, communicated by Prof. A. C. Twining, with letters from Mr. B. V. Marsh and Mr. F. W. Russell, 295.—On some North American Meteorites, by C. F. Rammelsberg, 297—comprising the so-called Meteoric Stone from Waterloo, Seneca Co., N. Y.: the so-called Meteoric Stone from Richland, near Columbia, S. C.: the so-called Meteoric Iron from Rutherford, N. C.: Bullettino Meteorologico dell'Osservatorio del Collegio Romano, etc., 293.

Miscellaneous Scientific Intelligence.—Editorial Correspondence—The Spectroscope, by Prof. J. P. Cooke: On prisms of Bisulphid of Carbon for optical purposes, by Prof. O. N. Rood, 299.—Ascent of the Volcano of Candarave, in a letter from Walter Stuart Church, 300.—Retorts, 302.—Old friends with new faces, 303.—*Obituary*—Marcel de Serres, 303.—H. H. de Senarmont: Dr. Henrich Georg Bronn, 304.—General Isaac I. Stevens, U. S. A., 305.

Proceedings of Societies: Bost. Soc. Nat. Hist.: Acad. Nat. Sci. Philad., 305.

NUMBER CII.

Page.

Art. XXV. On the Saliferous Rocks and Salt Springs of Michigan; by Alexander Winchell, - - - - - - 307

XXVI. On the Perception of Relief; by Prof. Edwin Emerson, 312

XXVII. On the Relations of Death to Life in Nature; by J. D. Dana, 316

XXVIII. On the Carbonates of Alumina, Glucina and the sesquioxyds of Iron, Chromium and Uranium; by Theodore Parkman, Ph.D., - - - - - - - - - - 321

XXIX. Supplements to the Enumeration of Plants of Dr. Parry's Collection in the Rocky Mountains.—Supplement I, Coniferæ; by Drs. Parry and Engelmann, 330.—Supplement II, Revision of the Œnotheræ of the subsection Onagra; by Dr. Engelmann, 332.—Supplement III, Revision of the genus Castilleia; by A. Gray, 335.—Supplement IV, Review of the genus Mertensia; by A. Gray, 339.

XXX. Researches on the Platinum Metals; by Wolcott Gibbs, M.D., 341

XXXI. Geographical Notices. No. XVIII.—Return of Hall's Arctic Expedition, 356.—Anniversary of the Royal Geographical Society: Ordnance Survey of Great Britain and Ireland, 358.—Topographical Survey of Spain, 361.—Khanikoff's Researches in Persia, 362.—Various recent English Surveys in China, 363.—Measurement of a Peak in the Karakorum range, second in height to Mount Everest, 365.—Fiji Islands, 366.

Page.

XXXII. Contributions from the Sheffield Laboratory of Yale College.—IV. Observations on Caesium and Rubidium; by OSCAR D. ALLEN, Ph.B., - - - - - - - - 367

XXXIII. Abstract of an investigation of the solar diurnal variation and of the annual inequality of the Horizontal Component of the Magnetic Force, from Observations made at the Girard College Observatory, between 1840 and 1845; by A. D. BACHE, LL.D., F.R.S., Sup't U. S. Coast Survey, - 373

XXXIV. Abstract of the investigation of the influence of the Moon, on the Horizontal Magnetic Force, from observations made at the Girard College Observatory, in the years 1840–1841–'42–'43–'44–'45; by A. D. BACHE, LL.D., F.R.S., Sup't U. S. Coast Survey, - - - - - - - 381

XXXV. On Arithmetical Relations between Chemical Equivalents; by M. CAREY LEA, - - - - - - - 387

XXXVI. Description of Calamoporæ, found in the gravel deposits near Ann Arbor, Michigan, with some introductory remarks; by CARL ROMINGER, M.D., - - - - - - - - 389

XXXVII. On a remarkable form of Rotation in the pith cells of Saururus cernuus; by GEORGE C. SCHAEFFER, M.D., - - 400

XXXVIII. On the occurrence of Triphyline at Norwich, in Massachusetts; by GEORGE J. BRUSH, - - - - - - 402

SCIENTIFIC INTELLIGENCE.

Physics.—Contributions to the Spectral Analysis, 403.—Researches on the Solar Spectrum, 404.—Some observations of the Solar Spectrum, WEISS: Note by W. G., 406.—On the Blue Lithium line, FRANKLAND: On the projection of the colored rays of Metallic Spectra, DEBRAY, 407.

Chemistry.—Lithium and Strontium in a Meteorite, ENGELBACH: Note by W. G.: On the presence of Rubidium in certain plants, GRANDEAU, 407.—On a presumed conversion of Phenylic into Rosalic acid, etc., B. BINDER: On the transformation of Phenate into Rosalate of Lime, B. BINDER, 408.—Thallium, CROOKES, 409.—Oxyds of Thallium, 410.—Thallic Acid: Chlorid of Thallium: Sulphid of Thallium: Carbonate of Thallium: Sulphate of Thallium: Iodid of Thallium: Phosphate of Thallium: Ferrocyanid of Thallium, 411.—Cyanid of Thallium: Chromate Thallium, 412.

Technical Chemistry.—Photography.—For Photographic copying in pure Black and White, 413.

Geology.—Observations on the Appalachian region of Southern Virginia; by J. P. LESLEY, 413.—Dyas, oder die Zechstein formation und das Rothliegende, von Dr. HANNS BRUNO GEINITZ, etc.,415.—On the footprints of Limulus as compared with the Protichnites of the Potsdam Sandstone, by J. W. DAWSON, 416.—Note on the above, by J. D. D., 417.—Fifteenth Annual Rpeort of the Regents of the University of the State

of New York on the condition of the State Cabinet of Natural History, &c.: Letter from E. JEWETT on the age of the Catskill Group of rocks, 418.

Botany and Zoology.—Dimorphism in the Genitalia of Flowers, 419.—Fertilization of Orchids through the Agency of Insects, 420.—Platanthera orbiculata, 422.—Platanthera ciliaris and P. blephariglottis: Platanthera fimbriata: Platanthera psycodes, 424.—Platanthera lacera: Platanthera dilatata, 425.—Platanthera hyperborea: Gymnadenia tridentata, 426.—Goodyera: Goodyera pubescens, Spiranthes cernua and gracilis, 427.—Upon a new species of Tomopteris, W. C. M., 429.

Astronomy and Meteorology.—Name of Asteroid (56): The Asteroids Feronia and Niobe: Name of Asteroid (73): Discovery of Asteroid (74): Discovery of Comet I, 1862, 430.—Comet II, 1862: Minima of Algol: Maximum of Omicron Ceti: Detonating Meteoric fireball of Dec. 3d, 1861, 431.

Miscellaneous Scientific Intelligence.—The Thirty Second Meeting of the British Association for the Advancement of Science, 432.—Physical Section: On the extent of the Earth's Atmosphere, by Prof. CHALLIS: On the Augmentation of the Apparent Diameter of a body by its Atmospheric Refraction, by the Rev. Prof. CHALLIS, 434.—Provisional Report on Thermo-electric Currents in Circuits of one Metal, by F. JENKIN: On the Zodiacal Light and Shooting Stars, by Prof. CHALLIS, 435.—On Autographs of the Sun, by Prof. SELWYN, 436.—Some Peculiar Features in the Structure of the Sun's Surface, by JAMES NASMYTH: Chemical Section: On the Luminosity of Phosphorus, by Dr. MOFFAT, 437.—Geology: On the last eruption of Vesuvius, by Dr. DAUBENY, 439.—Zoology: On the Zoological Significance of the Brain and Limb-characters of Man, with Remarks on the Cast of the Brain of the Gorilla, by Prof. OWEN, 440.—Correspondence of Sir Wm. Reid and W. C. Redfield, 442.—Supposed fall of Meteoric Iron at St. Louis, Mo., 443.

Book Notices.—Dana's Manual of Geology, 444.—Contributions to the Ethnography and Philology of the Indian Tribes of the Missouri Valley; by Dr. F. V. HAYDEN, 446.—Transactions of the American Philosophical Society, 447.—Annual Report of the Board of Regents of the Smithsonian Institution for 1861, 448.—Journal of the Academy of Natural Sciences, Philadelphia, 450.

Obituary.—Death of General O. M. Mitchel, 451.—Newton Spaulding Manross, 452.

Index, 453.

ERRATA.

P. 65, l. 16 from bottom, for "nu-mamk," read "nu mank."—Same page, l. 11 from bottom, for "násh-ka-," read "kásh-ka-."—P. 101, in title of article, for "Schlangintweit," read "Schlagintweit."—P. 136, l. 11 from bottom, for "Trempaleon," read "Trempaleau."—P. 140, l. 5, for "contracility" read "contractility;" p. 144, l. 14, for "give" read "given"; p. 149, l. 8 from bottom, for "libani" read "Libani"; p. 150, l. 10, for "species" read "species"; p. 152, l. 11, for "immediatey" read "immediately;" p. 159, l. 12 from top, for "Civico Museo," read "Museo Civico."

P. 120, l. 13 from bottom, for "T. B. Biot" read "J. B. Biot"; p. 415, l. 5 from bottom, for "order" read "oder"; same page, l. 2 from bottom, for "Der" read "Dr."; p. 450, in part of edition, line 6 from bottom, for "Formation," read "Formations."

P. 207, 9th line from bottom, for *stibiconite* read *stibiconise.*

P. 449, line 21 from bottom, for 'Apppendix' *read* 'Appendix.'

Vol. XXXIII, p. 455, 2d column of Index, 7th line from top, for 417 read 451.

XXXIV, p. 89, 14th and 18th line from top, for *subariel* read *subaerial.*
